About me

Dispatch and sales manager transitioning to UI/UX design, combining communication skills, analytical thinking, and time management into new user-centered designs. I am curious and empathetic by nature. I enjoy figuring out how people interact with digital products. My background in logistics taught me how to manage complexity and anticipate needs, skills I now apply to create clear and intuitive user experiences.

Recent Experience

Sales & Dispatch Manager
Study Academy, Odesa — 2021–2024
Workflow — Nov 2024–Present

- Improved communication between clients and teams helped identify pain points and optimize processes. This built a foundation for user-centered design thinking.
- Managed scheduling and logistics using structured time management, similar to project coordination in UX workflows.
- Collected feedback and matched user needs with business goals to create user-focused solutions.
- Improved service flow through analysis and decision-making, applying UX-style problem-solving.
- Maintained clear documentation and communication to foster transparent collaboration.
- Developed empathy, adaptability, and analytical thinking, which are essential for understanding and designing for users.
